

YEE QIAN HUI (ZEN YEE)

SOFTWARE DEVELOPER

Email: qhui.yee@gmail.com | Mobile: +6016 4461314 | Location: Kuala Lumpur

Portfolio: <https://zen-portfolio-v2.vercel.app/>

SKILLS:

Technical: HTML, CSS, JavaScript, Bootstrap, Node.js, Express.js, jQuery, EJS, MySQL, PostgreSQL, React, Microsoft Office

Language: English, Malay, Mandarin, Cantonese

WORK EXPERIENCE:

Software Developer | Impact Business Solutions Sdn. Bhd.

Feb 2025 – Present

- **Database Architecture:** Designed and implemented database structures for a Smart City Digital Twin dashboard utilizing MySQL and PostgreSQL, ensuring efficient data storage and retrieval.
- **Backend Development:** Developed backend server using Node.js to process API calls, retrieve data from databases, and deliver real-time information to the frontend.
- **System Integration:** Integrated internal systems with external services, including open APIs, Google Maps API, and Video Management Systems (VMS). Developed a proxy server to facilitate secure authentication by obtaining authorization codes from client applications, automating the token refresh process, and ensuring continuous and secure data access.
- **Frontend Development:** Converted Figma UI designs into responsive and functional dashboard components, ensuring seamless user interfaces across devices.

Master Data Maintenance (MDM) Analyst | Steelcase Office Solutions (Malaysia) Sdn. Bhd.

May 2023 – Jan 2025

- **Data Management:** Managed the entry, maintenance, and validation of master data records, including customer, vendor, and material data, ensuring data accuracy and consistency.
- **Support & Troubleshooting:** Provided ongoing support and troubleshooting for data-related issues.
- **Documentation:** Documented SOPs to streamline processes and ensure compliance.
- **Automation:** Developed and implemented automation using Microsoft VBA to compile, validate and input data into SAP system from multiple request forms, improving efficiency.

Mechanical Design Engineer | Greatech Technology Berhad

Nov 2022 – May 2023

- **CAD Modeling:** Created detailed CAD models and engineering drawings for custom machinery and automated systems, adhering to industry standards.
- **Design Solutions:** Developed innovative design solutions to meet customer requirements, enhancing product functionality and performance.
- **Customer Collaboration:** Translated customer requirements into design specifications, ensuring alignment with client expectations.

Project Intern | Malaysia Airlines Berhad (MAB)

Aug 2021 – October 2021

- **UI/UX Design:** Designed and developed data collection forms for a flight safety audit project, focusing on error-proof design to ensure data accuracy. Participated in usability testing to gather feedback and improve user experience.
- **System Integration:** Assisted in integrating frontend and database, facilitating seamless data flow.

EDUCATION:

Bachelor's Degree of Manufacturing Engineering with Management | Universiti Sains Malaysia

2018-2022 | CGPA 3.61
